

Foundry Keyboard Standard.

If there are any questions feel free to contact Matt Brannies

Button variants:

- Lower case
- Upper case
- Lower case pressed
- Upper case Pressed

Demonstration of how the buttons should work:

This is just to show that pressing the buttons turns them blue and there is haptic feedback.

Using the laser pointer should also yield the same results.

Note* the back button goes from light blue to dark blue. (backward from the rest)

The orange buttons turn yellow.

Button spacing.

Follow the following picture for spacing.

The backdrop is 2007px X 707px
